

# Baselines

---

## Prover (Ryou et al. 2021)

You can download the source code of Prover from <https://github.com/eth-sri/prover>. We also put it in the `Baselines/Prover` directory of the supplementary material.

## RNN-Guard (Zhang et al. 2023)

Because the RNN-Guard paper does not provide the source code, we implement the model by ourselves. You can find the source code in the `Baselines/RNN-Guard` directory of the supplementary material.
